ILLINOIS TRADE TOKEN DIES

These are cylindrical steel dies used to strike Illinois trade tokens(circa 1930s;some probably earlier). I do not know which token mfr. they are from. The dies are about 1½" tall and are in nice condition with just slight to very light traces of rust(ones with more rust are noted). The diameter given is that of the die face; the cylinder may be a few mm wider. Most of the dies represent tokens unlisted in Vacketta's catalog of Ill.trade tokens(these denoted by a * after the size. Many scarce towns and some unlisted towns are in this offering, which is the entire hoard I acquired. (Min. Bid \$3 each).
